

# The positive power of AI

## A fireside chat with FDM CIO Jonathan Young, Data Architect Sarah Wyr and Deloitte's Digital Risk Director Lewis Keating

10<sup>th</sup> April 2024

12:00-14:00

No1 Whitehall Riverside, Leeds LS1 4BN  
Lunch and Networking Event

Join us for an afternoon of expert opinion and debate, as our FDM thought leaders discuss with guest speaker Lewis Keating how AI has the power to provide valuable insights, and streamline processes within businesses.

## Speakers

### Jonathan Young CIO

Jonathan examines how Incorporating AI into business operations offers unparalleled opportunities for efficiency, and growth. By harnessing AI's predictive analytics, automation and capabilities, businesses can streamline processes, optimize decision-making, and gain a competitive edge in today's landscape

### Sarah Wyr Data Architect

Sarah is working towards a PhD in how gender bias manifests itself within AI, particularly in Large Language Models like ChatGPT. Her work highlights the need for diverse teams in AI development, and questions how the decisions we make when developing AI can impact society.

### Lewis Keating Digital Risk Director

Lewis examines the key questions companies face regarding generative AI, such as risk frameworks and governance structures, copyright issues, hallucinations and bias, harnessing private data sets, and workforce transformation.
